

Paso a paso para la actividad 1

Paola García

30 de abril de 2026

Creación de la cuenta de Git Hub

The screenshot shows the GitHub mobile app sign-up interface. At the top, there's a header with a purple cat icon and the text "Sign up for GitHub". Below this, there are three main input fields: "Email" with the value "apaola.garcia09@gmail.com", "Username" with the value "apaolagarcia09-ops" (highlighted with a green checkmark), and "Your Country/Region" with a dropdown menu set to "Colombia". Below the country selection, there's a small disclaimer: "For compliance reasons, we're required to collect country information to send you occasional updates and announcements." Underneath, there's an "Email preferences" section with a checkbox labeled "Receive occasional product updates and announcements". At the bottom of the form is a large black button labeled "Create account >". Below the button, there's a line of text: "By creating an account, you agree to the [Terms of Service](#). For more information about GitHub's privacy practices, see the [GitHub Privacy Statement](#). We'll occasionally send you". At the very bottom, there's a mobile browser navigation bar with a back arrow, a tab labeled "github.com", a refresh icon, and a menu icon.

See what's included

Creación del Token clásico para hacer los Push más seguros

GitHub Apps

OAuth Apps

Personal access tokens

Fine-grained tokens

Tokens (classic)

New personal access token (classic)

Personal access tokens (classic) function like ordinary OAuth access tokens. They can be used instead of a password for Git over HTTPS, or can be used to [authenticate to the API over Basic Authentication](#).

Note

termux

What's this token for?

Expiration

No expiration

GitHub strongly recommends that you set an expiration date for your token to help keep your information secure. [Learn more](#)

Select scopes

Scopes define the access for personal tokens. [Read more about OAuth scopes](#).

☒ repo	Full control of private repositories
☒ repo:status	Access commit status
☒ repo:deployment	Access deployment status
☒ public_repo	Access public repositories
☒ repo:invite	Access repository invitations
☒ security_events	Read and write security events

Creamos el repositorio llamado “programadores-para-la-paz”

1

General

Owner *

apaolagarcia09-ops

/

Repository name *

programadores-para-la-paz

⚠️ programadores-para-la-paz already exists in this account

Great repository names are short and memorable. How about [fictional-octo-umbrella?](#)

Description

Aquí vamos a ver la evolución de la ruta de aprendizaje

56 / 350 characters

2

Configuration

Choose visibility *

Choose who can see and commit to this repository

Public

Add README

READMEs can be used as longer descriptions. [About READMEs](#)

Off

Add .gitignore

.gitignore tells git which files not to track. [About ignoring files](#)

No .gitignore

Add license

Licenses explain how others can use your code. [About licenses](#)

No license

Create repository

Comandos en terminal para agregar archivos, mensajes y subir la carpeta al archivo

```
● PS C:\Users\juand\OneDrive\Desktop\trabajo_paola> git add .

Finalmente, se subió todo al repositorio

The image displays two screenshots of a GitHub repository interface. The top screenshot shows the repository's main page, which includes a list of commits, a README file, and a sidebar with repository statistics. The bottom screenshot shows the repository's file structure, with a sidebar listing files and folders, and a main area displaying the content of the selected file, which is the README.
